Receive DAVANTIS video analytics alarms in your Gemini Alarm Monitoring Software

DAVANTIS is 100% devoted to video analytics for perimeter security. Over 15 years investigating beyond the obvious, using powerful and state-of-the-art algorithms to boost your cameras.

Gemini is a new generation alarm monitoring software providing an integrated and innovative platform for the control room and security operations centre. Simple to use but powerful in its operation, Gemini automates the whole process, managing

security, fire and CCTV and lone worker alarms, and guiding the operator through a workflow of response tasks.

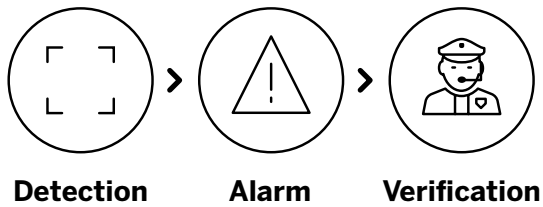

Now you can monitor DAVANTIS accurate video analytics alarms in your Gemini monitoring software.

“ False alarms waste operators’ time, they can delay the handling of genuine alarms and clog up the system. Minimising them is an essential priority for monitoring control rooms. Davantis technology in the Bold platform helps filter out false and nuisance alarm activations, improves efficiency and quality of service, and is a popular solution among Gemini users.

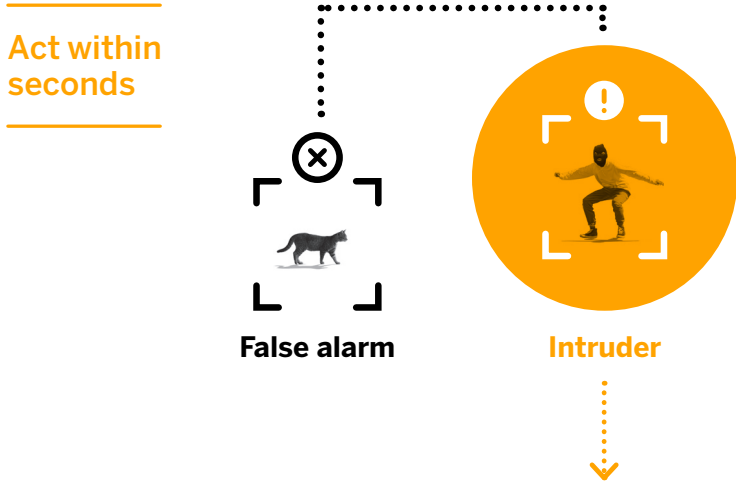

Brian Kelly, MD, Bold Communications

”

Why DAVANTIS? —

ClickThru™ *

With us you will always know what triggered the alarm

Having verified the presence of an intruder, the system facilitates remote activation of deterrent devices.

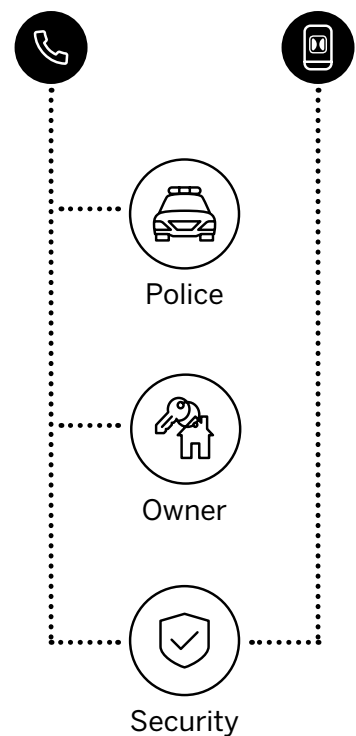

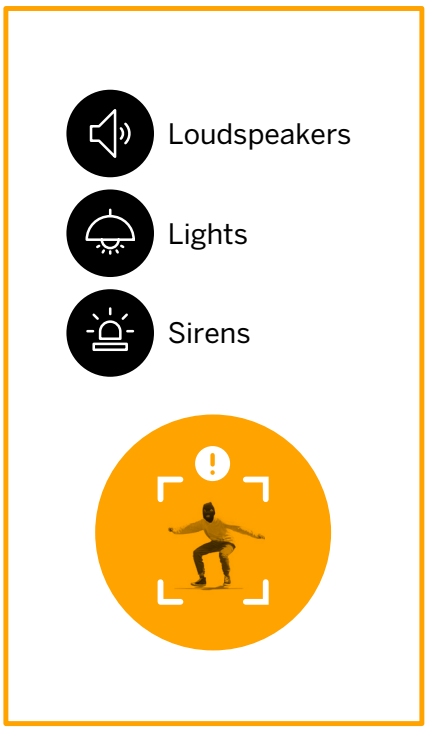

Your security staff can use our app to monitor the site and act within seconds.

ClickThru™

Click 1
Snapshot with a box highlighting the cause of the alarm.

Click 2
Video of the alarm at the activation point.

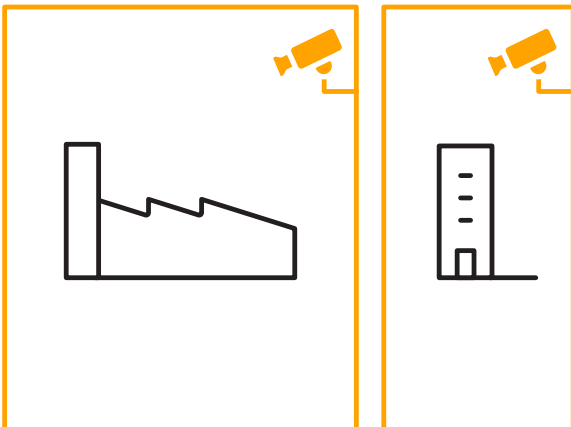

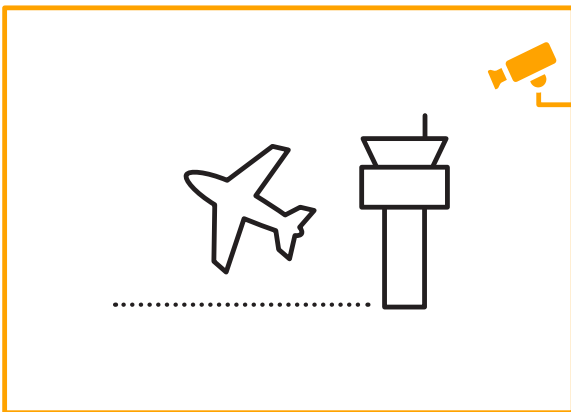

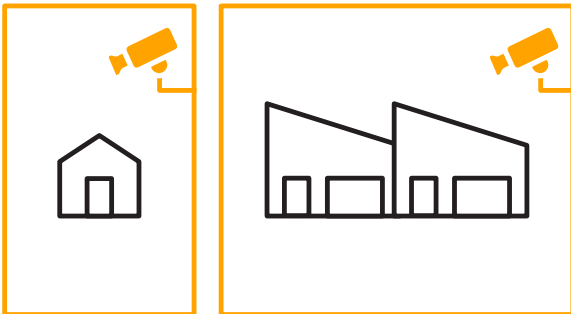

Click 3
Live access to the camera for immediate verification.

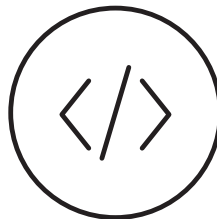

How do you connect DAVANTIS with Gemini Alarm Monitoring Software? —

Integrated Security

Manage more installations with fewer resources

Alarm management

Gemini Alarm Monitoring Software

The Davantis Bold integration supports access to Gemini CCTV alarm handling features:

- View live video and pre-alarm clips
- View single cameras or groups
- PTZ screen control
- Give audio warnings to site and listen in
- Apply global, custom, manual or automated handling tasks
- CCTV alarm handling tasks can be configured as a workflow
- Integrate conventional alarm panels with live and alarm video
- Direct camera import for time saving
- Multi-view screens for multiple site displays
- Interactive site plans
- Reference image support
- Alarm event can be received from any trigger or system
- Supervised connection
- BS5979, BS8418 and EN50518 reporting compliance
