

# WPN & DAVANTIS: High Security Projects —

Christian Klier, WPN founder and CEO

There are several factors to consider when designing a perimeter security system. Immediate intruder detection is crucial, but so is a low rate of false alarms and streamlined integration with the video analytics system. DAVANTIS uses technical know-how to ensure our perimeter security solutions satisfy the expectations of end-users, alarm monitoring stations and installers.

That's why we want to celebrate our year-long alliance with professional security company WPN and look forward to future collaboration on many more critical infrastructure installations.

Our perimeter [video analytics solutions](#) can detect trespassers and incidents in record time while cutting false alarms to extremely low rates

and reducing the expense involved in managing incidents.

WPN, Waypoint Network AG, is a Swiss company founded in 1999 as a network of **professional integrators, alarm monitoring stations and other security systems**. Its professionalism has earned it an excellent reputation and it has won some major security contracts for which it has selected our smart video analytics solutions. During the last year, DFUSION and DAVIEW have been integrated in several WPN perimeter security projects with outstanding results.

**Why DAVANTIS?  
In the words of WPN  
founder and CEO  
Christian Klier:**

“We have been collaborating with DAVANTIS in an excellent partnership to create high performance perimeter surveillance systems. DAVANTIS solutions ensure the highest level of reliability and security on the complex sites and projects managed by WPN. The new DFUSION solutions are outstanding for reducing **false positives and their detection results are excellent**. Not only does DFUSION increase the effectiveness of DAVANTIS video analytics, but it also brings obsolete infrastructures right up

---

“

*Not only does DFUSION increase the effectiveness of DAVANTIS video analytics, but it also brings obsolete infrastructures right up to date, transforming them into state-of-the-art technology with no large-scale investments*

”
