

DFUSION /3

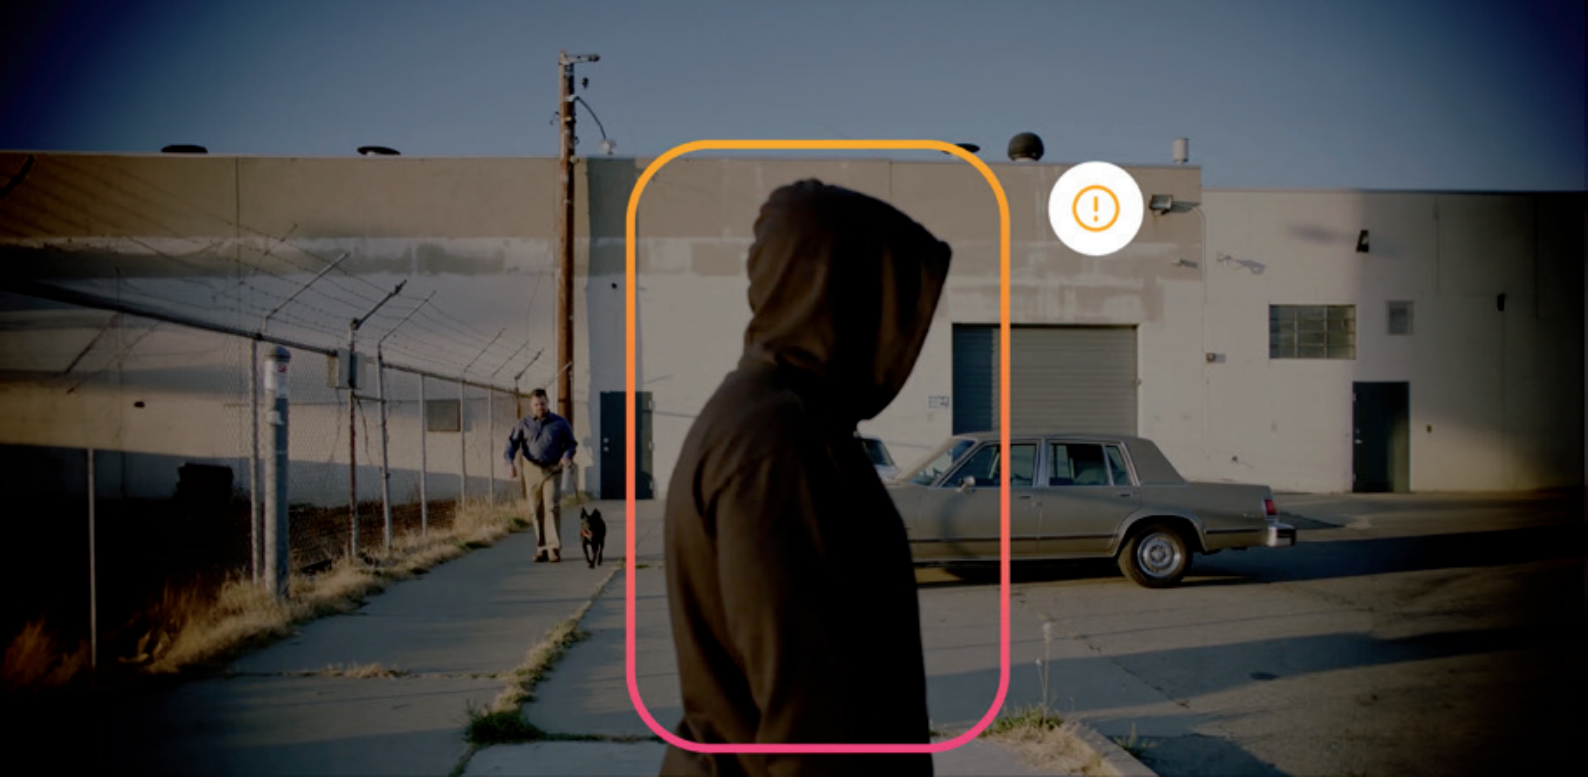

new detection models online course

Discover the most powerful generation of video analytics and optimise your security system

The new DFUSION /3 detection models are capable of interpreting behavioural patterns to anticipate intentions before they become risk situations

What will you learn?

Discover the technical innovations of the new DFUSION /3 solution.

Learn how to configure cameras with technical training and practical recommendations.

Create basic rules to analyse the behaviour of people, vehicles and animals.

Customise each camera with Super rules, combining different types of rules and detections to achieve maximum precision.

Discover the full potential of behaviour detection, learn to think like an expert and solve any challenge in your installation.

Any questions?

Our expert team will advise and guide you through every stage of the project, from sales visits, design, and planning, to commissioning the installation.
