

Site Planning Tool course

The easy way to design perimeter security projects

Get everything right the first time with our reliable technical tool. We're here with you every step of the way to ensure that everything is a success.

What will you learn?

Create projects with all types of camera: day/night, thermal, with different lens settings by any manufacturer

Import and export projects and share them with our experts for help and advice

Send projects to your customers in pdf format, personalised with your company logo

Mount cameras in precisely using GPS coordinates

Find the exact detection distance of each camera with its corresponding lens

Calculate the angle of view for effective viewing in the horizontal plane

Detect dead zones to avoid blind spots in your perimeter protection system

See real examples of complex systems

Any questions?

Our expert team will advise and guide you through every stage of the project, from sales visits, design, and planning, to commissioning the installation.
