# Integration

DAVANTIS / evalink

—

Receive DAVANTIS video analytics alarms in evalink

DAVANTIS is 100% devoted to video analytics. Over 20 years investigating beyond the obvious, using powerful and state-of-the-art algorithms to boost your cameras.

Evalink offers state of the art alarm handling with screen layouts designed by the System Administrator. Each layout is customised for the alarm type and the number of monitors.

Whether handling intruder, video, environmental, lone worker or any other alarm type, the operator has a consistent user interface, independent of the equipment manufacturer. Training is faster and the operation is simplified.

Now you can monitor DAVANTIS accurate video analytics alarms in your evalink monitoring software.

Easy verification, fast action

Security in 3 Clicks

Detection

Alarm

Visual verification

Click 1
Snapshot with a frame highlighting the cause of the alarm.

Click 2
Alarm video clip at the point of activation.

Click 3
Access to the camera for immediate verification.

Remote deterrence

Lights / Speakers / Sirens / Police / Owner / Security

ClickThru™

Exclusive real-time verification system in 3 clicks.

Drastically reduces false alarms. Lower costs. Less operator fatigue. Faster response to real threats, even in complex scenarios.
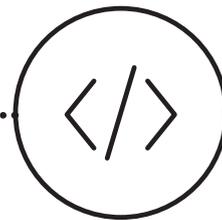

How do you connect DAVANTIS with evalink?

Integrated Security

Watch more installations with fewer resources

Alarm management
