

Solutions for Control Centres

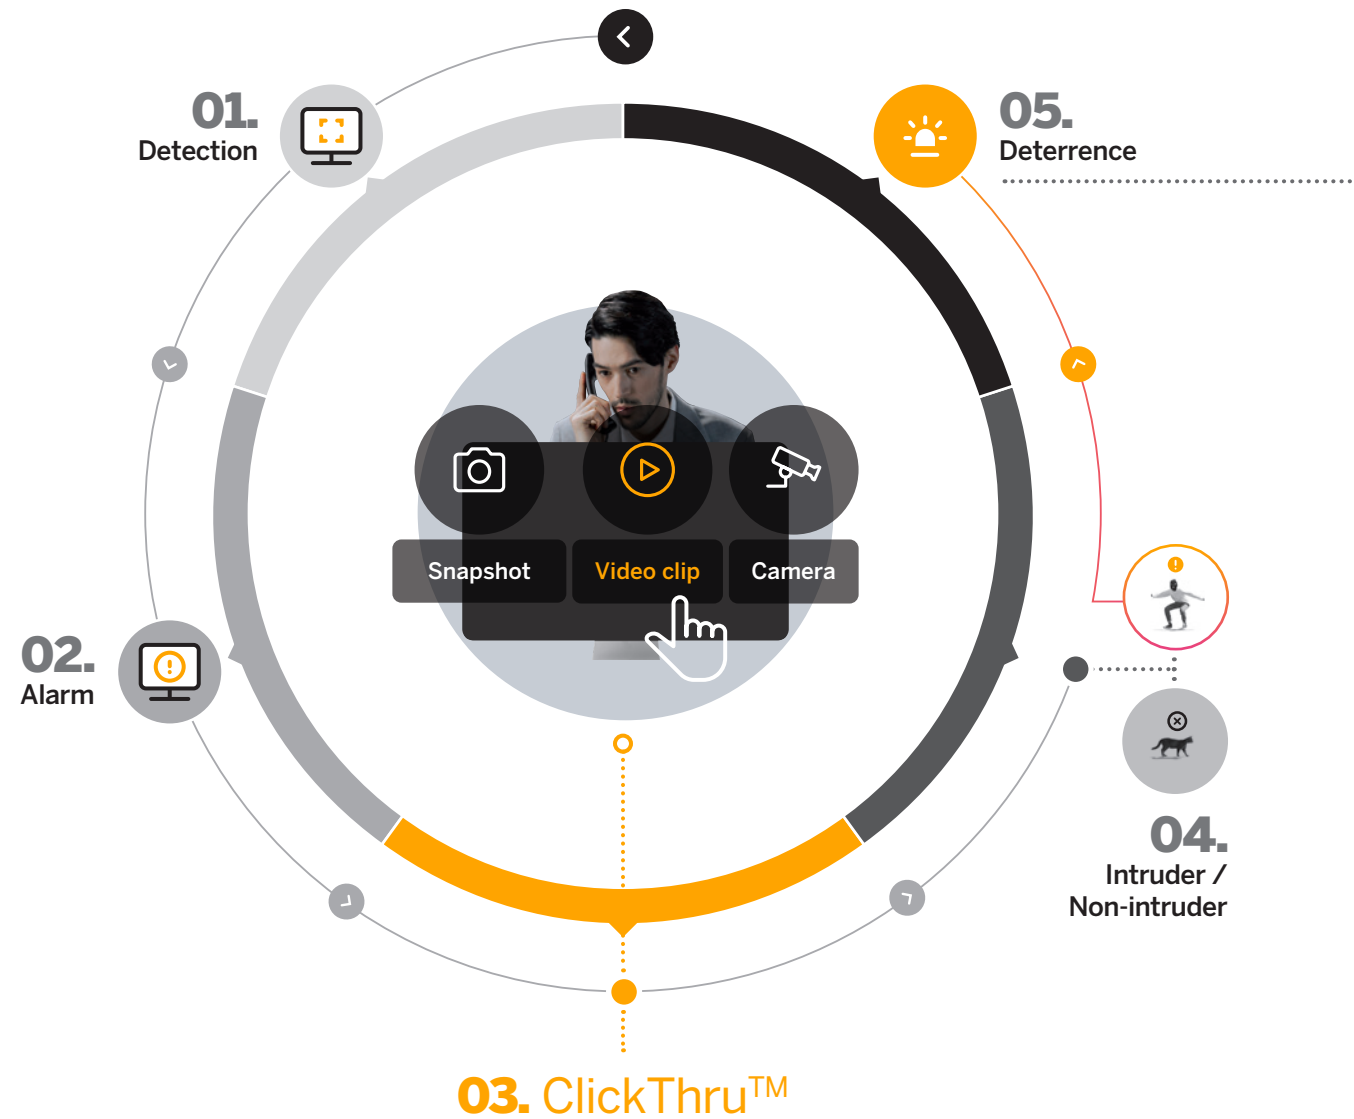

**With DAVANTIS, you
always know what
triggered the alarm**

**Manage more sites
with fewer resources**

**Compatible with
leading alarm
management software**

Verification process

Exclusive, simple and effective alarm management system

Click 1

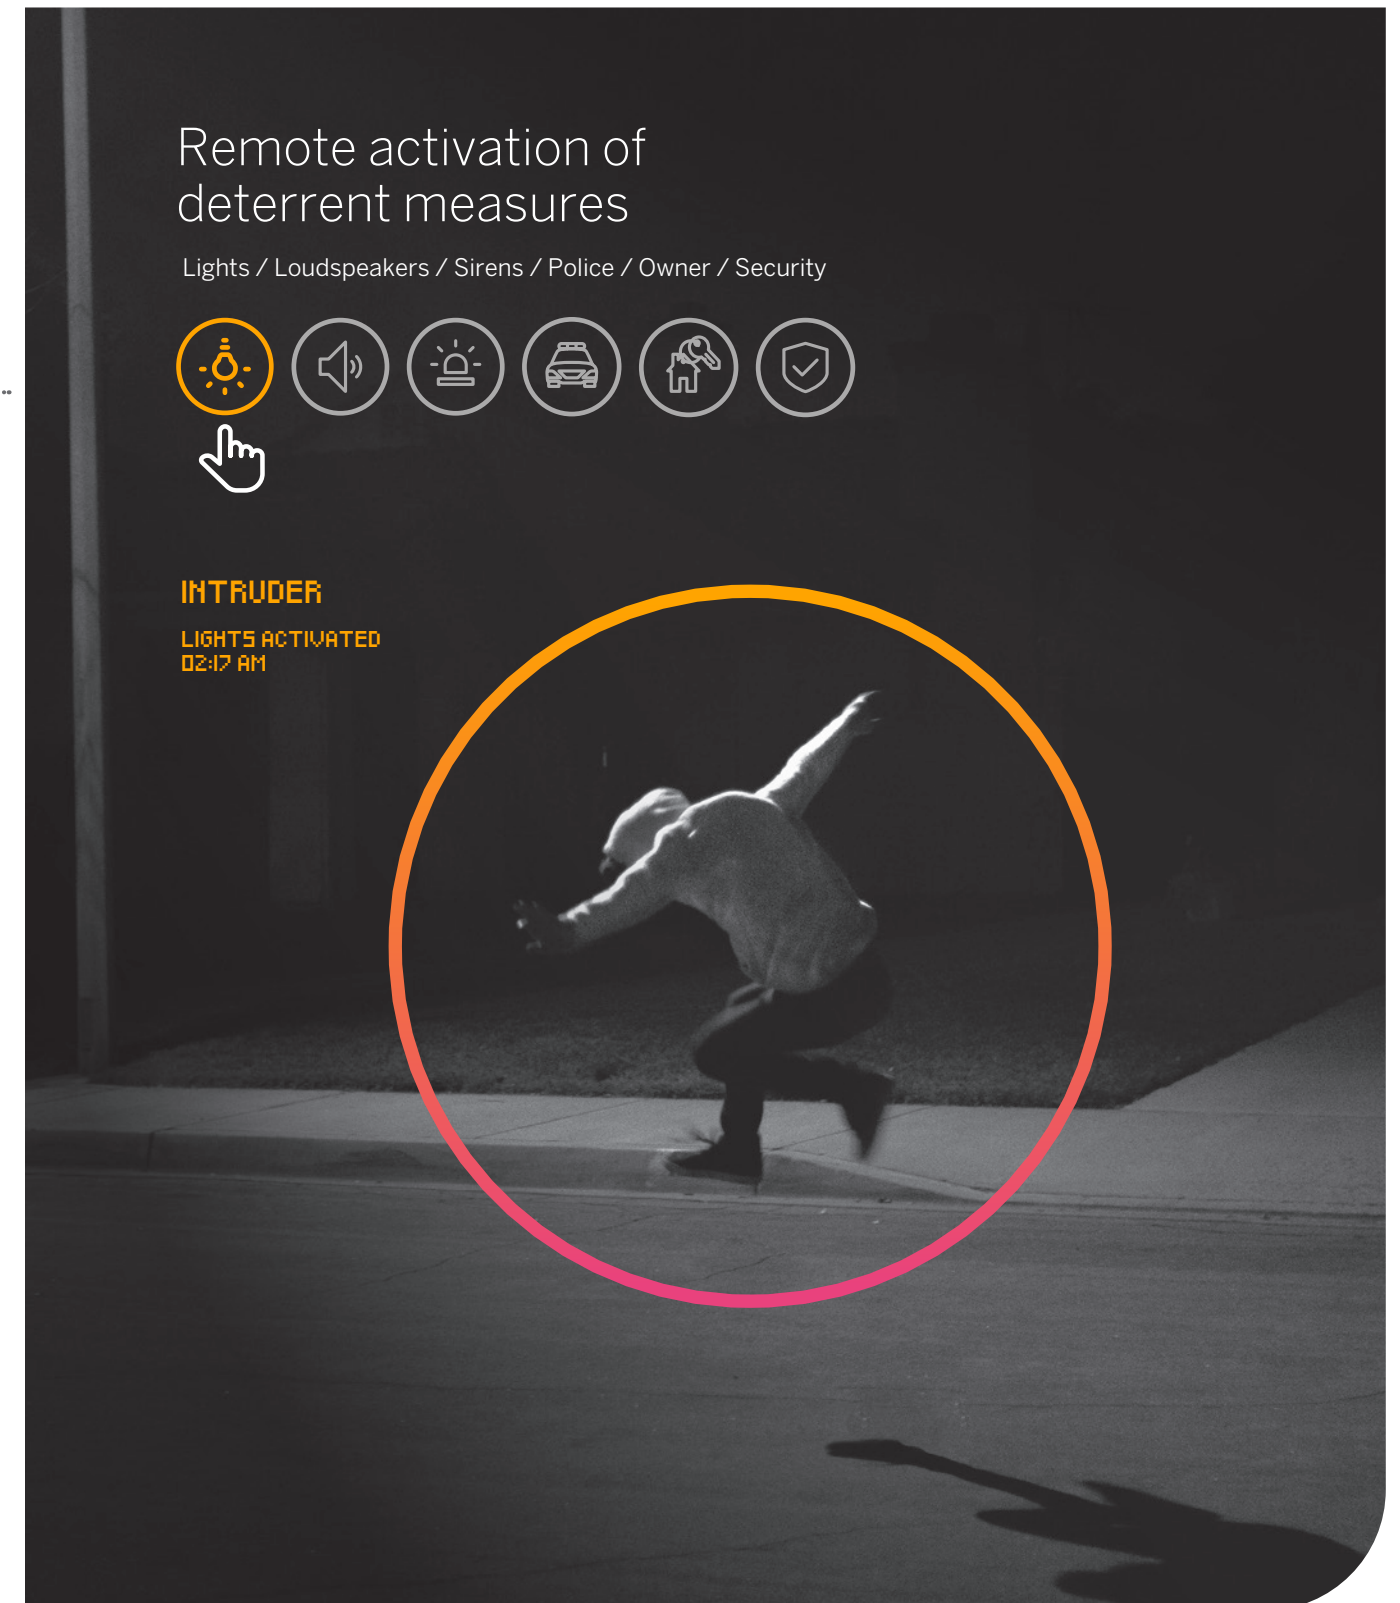

Snapshot with a frame highlighting the cause of the alarm.

Click 2

Alarm video clip at the activation point.

Click 3

Direct camera access for immediate verification.

DFUSION /3, unlimited detection

Interprets behaviour to detect intentions prior to an incident

Reduces false alarms caused by insects, rain, poor lighting, etc.

Anti-tampering and fault detection alerts

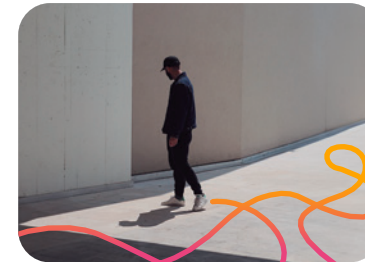

Intruder detection at long distances or when partially obscured

Customise each camera and combine the scenarios you need

Stationary vehicle
+5 minutes
No person present
Alert

Camera 01

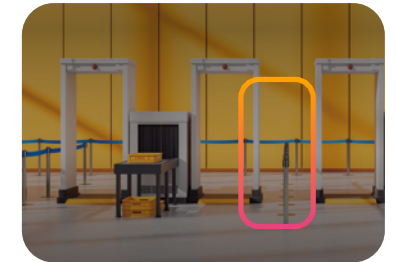

Example / In this area, an alert will be triggered with the following combination: a stationary vehicle + 5 minutes + no person present.

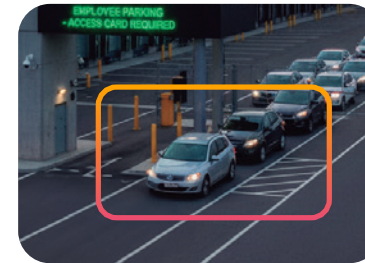

Loitering

Suspicious presence

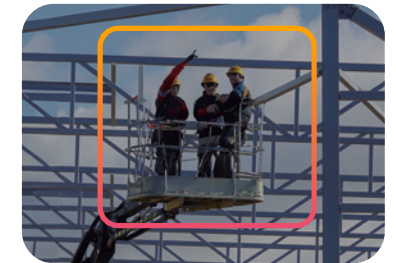

Absence detection

Tailgating

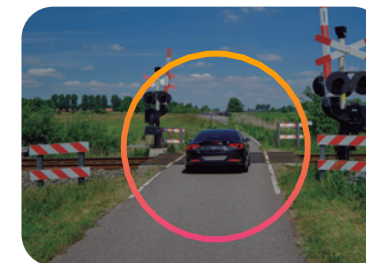

Motionless person

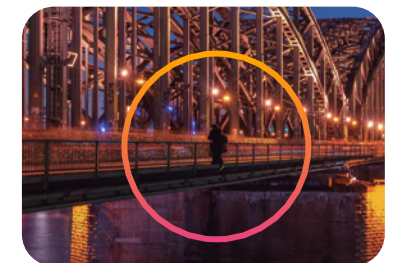

Overcapacity

Long queues

Rail crossings

Bridge safety

Prolonged ATM presence

Animals on the road

Exceeding loading time

Whatever your cms, VMS or PSIM, we are compatible

Monitor more sites with fewer resources

We integrate with leading alarm management software

Need a complete CMS solution?

Daview AMS, total control of your installations

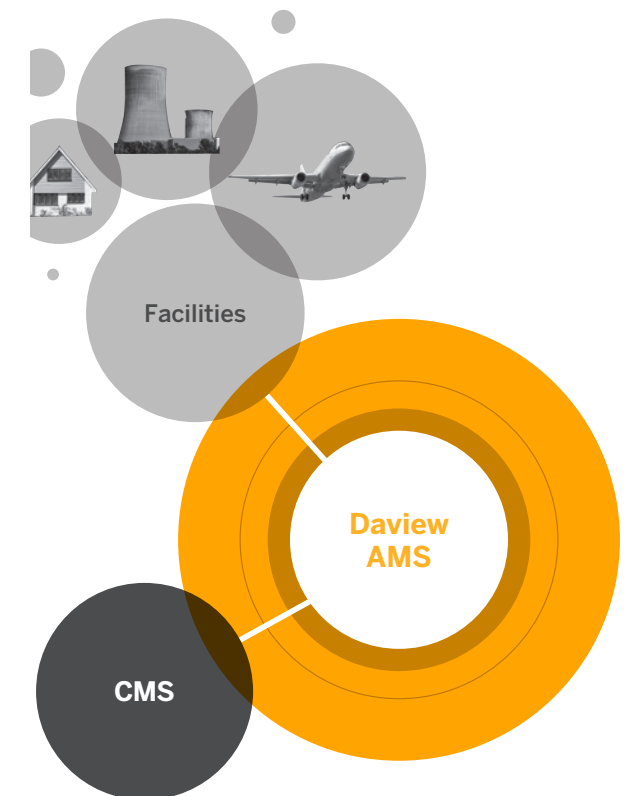

Fast alarm verification

Connection supervision
